

SUMMER PROGRAM

NEED A STRUCTURED AND GOAL BUILDING PROGRAM FOR THE SUMMER?

Our Program is designed to help children and adolescents with emotional and behavioral challenges develop and maintain positive attitudes and age appropriate behavior. Each participant receives an individualized service plan tailored to meet his or her needs by combining psychotherapeutic interventions, educational and mental health treatment.

AES SUMMER FUN PROGRAM

The program is designed to build character in youth through activities that stimulate creativity, encourage personal responsibility, and foster age appropriate social skills. Our extended day program is one component of the year round intervention offered through our therapeutic day treatment services.
